

MARCUS ELLERY

Stockport, Greater Manchester | m.ellery@example.com | 07700 900412

PRINCIPAL BACKEND ENGINEER

Nine years building and running backend systems, the last six in Go. Currently responsible for the order platform at a national parcel marketplace.

EXPERIENCE

Principal Backend Engineer — Kestrel Freight Exchange, Manchester

March 2021 – present

- Own the order and settlement platform: 11 Go services, roughly 40 million events a day at peak.

- Split the monolithic booking service into three Go services, taking checkout p95 from 1.4s to 210ms and removing the Black Friday freeze entirely.

- Designed the PostgreSQL partitioning strategy for the events table (now 4.2bn rows) and rewrote the settlement queries, cutting nightly reconciliation from 6 hours to 25 minutes.

- Line manage six engineers. Run the hiring loop and the internal Go guild.

- Introduced the on-call rota and cut Sev-1s from 14 to 3 a year.

Senior Software Engineer — Halden Freight Systems, Manchester

June 2017 – February 2021

- Built the carrier integration layer in Go and Python across 22 carrier APIs.

- Owned PostgreSQL schema design and the migration tooling for the tracking database.

- Mentored two junior engineers through to mid-level.

Software Engineer — Ardwick Digital, Manchester

September 2016 – May 2017

- Java and Spring work on retail integrations.

TECHNICAL

Go (6 years, primary), Python, PostgreSQL, Kafka, Terraform, AWS, Docker.

Kubernetes — production since 2022, own the platform team's Helm charts.

EDUCATION

BEng Software Engineering, University of Sheffield, 2016. First class.

OTHER

Notice period: 3 months.

Salary expectation: £88,000.

Happy with hybrid working. Based 8 miles from central Manchester.
